⑤④ COMPOSITION COSMETIQUE COMPRENANT AU MOINS UNE PHASE GRASSE LIQUIDE STRUCTUREE PAR
DES POLYURETHANES ET/OU POLYUREES.

⑤⑦ Composition cosmétique comprenant au moins une
phase grasse continue liquide contenant au moins une huile
hydrocarbonée, structurée par au moins un polymère choisi
parmi les polyuréthanes et les polyurées solubles ou disper-
sables dans l'huile hydrocarbonée, comportant

. au moins deux groupes uréthanes, deux groupes urées
ou au moins un groupe méthane et un groupe urée dans la
chaîne, et

. au moins une séquence ou un greffon hydrocarboné ou
polyester aliphatique à longue chaîne hydrocarbonée.

FR 2 814 365 - A1

Cosmetic composition for use in skin care and make-up comprises fatty liquid phase containing at least one hydrocarbon oil and polymer selected from polyurethanes and polyurea, soluble or dispersible in hydrocarbon oil

Abstract of FR2814365

Cosmetic composition comprises continuous fatty liquid phase containing at least one hydrocarbon oil, with at least one polymer selected from polyurethanes and polyurea, soluble or dispersible in hydrocarbon oil, and bearing at least two urethane or urea groups, or at least one of each within chain, and at least one sequence or graft of hydrocarbon or aliphatic polyester with long hydrocarbon chain. Independent claims are also included for (1) cosmetic process of care, make-up or treatment of keratin matter, comprising application of cosmetic composition as claimed; (2) use of polymer selected from polyurethanes or polyurea, bearing at least two urethane or urea groups, or at least one of each within chain, and at least one sequence or graft of hydrocarbon or aliphatic polyester with long hydrocarbon chain, in cosmetic composition comprising continuous fatty liquid phase containing at least one hydrocarbon oil, to structure this fatty phase; and (3) use of continuous fatty liquid phase containing at least one hydrocarbon oil, and structured with at least one polymer selected from polyurethanes and polyurea, soluble or dispersible in hydrocarbon oil, and bearing at least two urethane or urea groups, or at least one of each within chain, and at least one sequence or graft of hydrocarbon or aliphatic polyester with long hydrocarbon chain, for production of physiologically acceptable composition, producing, on application, a non-migrating deposit, resistant to water, saliva, sebum and/or tears, and/or having prolonged duration of staying, and/or non-transfer properties .
